(ix) copolymers of dicarboxylic acid and polyalkylenepolyamines;

wherein said polyamino polymer is present in an amount effective to inhibit light-induced peroxidation of proteins, protein derivatives, and lipids.

REMARKS

I. Request for Interview

Prior to examination of this paper and the accompanying Request for Continued Examination, the Examiner is requested to contact the undersigned at 202-408-4328 so that an interview can be scheduled. Applicants will also contact the Examiner, in order that an interview can be scheduled at a mutually agreeable time.

II. Status of the Claims

Claims 1-44 are pending. Claims 29-32, 36, and 38-44 were withdrawn from consideration by the Examiner, as being directed to a non-elected invention, in the Restriction Requirement dated January 19, 2000.

Without prejudice to or the disclaimer of any subject matter, claims 1 and 37 have been amended to more particularly point out and distinctly define the claimed invention. Specifically, the "at least one polyamino polymer" is now defined as the "(A) polyalkylenepolyamine polymers," i.e., (A)(i) through (A)(ix). Accordingly, claims 1 and
